# SimplyPDF

An android library that allows the user to generate PDF files within the application ans save them in the device storage. This sample PDF is generated using this library

---

Version 1.0.0 supports the following basics:

> Text

> Shapes

> Images

> Can also set page background color

It can draw shapes like these:

White text on magenta background page.

That is all in Version 1.0.0. Will enhance for more.
